QUALITÄT IN JEDEM RAD

Unsere Leichtmetallräder zeichnen sich durch eine einzigartige Optik aus.

Modernste Software ermöglicht bereits in der Planungsphase die Gestaltung von mathematisch und topologisch optimalen Geometrien. So wird jedes für die Festigkeit irrelevante Gramm Material gespart, um natürliche Ressourcen wie Aluminium oder Kraftstoffe zu schonen und um ein hervorragendes Fahrgefühl zu gewährleisten. Brock und RC-Design Leichtmetallfelgen werden vom Roh-Aluminium bis hin zum letzten Fertigungsschritt zu einhundert Prozent in Europa gefertigt. Unsere zentrale, hochmoderne Produktionsstätte gewährleistet dabei eine herausragende Qualität und Stabilität. Es werden höchste Sicherheit, als auch überdurchschnittliche Lebensdauer gewährleistet. Zertifizierte Managementsysteme in Qualität, Umwelt und Energie finden bei uns Anwendung. Diese unterstützen dauerhaft bei der kontinuierlichen Verbesserung neuer Produktgenerationen.

QUALITY IN EVERY WHEEL

Alloy wheels from Brock distinguish by their superior optics. Modern software allows the design of mathematical and topologically perfect geometries already in the planning phase. So every single, for the strength irrelevant gram, is saved to protect natural resources such as aluminum or fuels on the one hand, while ensuring an outstanding driving experience on the other hand. Furthermore, alloy wheels from Brock and RC-Design impress with their excellent stability and the highest security. They also have exceptionally long lifetimes. Certified management systems in quality, environment and energy are installed along the entire value chain and help us to improve new product generations continually.
